Dustcheck Parts Division >>>>>

Dustcheck Parts Division >>>>

When you've been in the dust control business since 1978, you inevitably learn a few valuable lessons about keeping the industry wheels turning. Many of our installations are production-critical, so reliability and availability are absolutely crucial. In a marketplace that can't tolerate delays, we've refined and improved our parts operation over the years to make sure that we can put the right part in the right place at the right time. Every time.

Any Part - Any Make

Our parts division makes all that expertise and experience available to you. We provide consumables and spare parts for all makes of dust control equipment, and we do it fast, reliably and economically.

Here are some examples of other makes for which we provide parts and service:

- Airmaster
- AAF
- DCE Donaldson
- Disa
- DEI
- Freudenberg
- Farr
- Heaton Green
- Infastaub
- Mikropol
- TS Filters
- Torrit
- Delta Neu
- Wam

Upgrade and Conversions

We have a successful pedigree in converting filters from bag to cartridge to either improve or increase performance.

Some conversion history:

DCE Unimaster	Converted to Reverse Jet Cartridge Filter	Improved Performance Reduced Running Costs
Mikropol Tubular Bag Filter	Converted to Cartridge Filter	Improved Performance Reduced Running Costs
DCE Dalamatic	Converted with Pleated Pad Element	Increased Filter Area and Improved Performance Reduced Running Costs

If you have a poor performing filter we will be pleased to advise.

As a stand-alone add-on to your business, or as an integrated solution with our service contract division, Dustcheck has the parts to keep you working.
